Project Atlas — Management Presentation

VistaPort Media Inc. — a global internet franchise in search, mail, news, sports, finance, identity and programmatic advertising. Prepared by management for discussion with prospective partners. Strictly confidential.

Forward-looking statements reflect management's current expectations and are subject to risks and uncertainties. Figures are unaudited unless otherwise stated.

1. Executive summary

- **Scale:** ~1.1bn registered accounts and 615m monthly active users across the portfolio.
- **Mobile reach:** 408m mobile monthly active users and 82m daily active email users.
- **Financial strength:** FY2025 revenue of \$5.15bn and adjusted EBITDA of \$775m.
- **Identity & ad-tech:** the AtlasID identity graph and the LumenX Ad Exchange power addressable, privacy-aware advertising at scale.
- **Value creation:** estimated synergy NPV of \$410m when combined with a telecoms customer base.

2. Franchise overview

VistaPort operates a portfolio of leading consumer destinations and a full programmatic advertising stack. Daily engagement spans communication (VistaMail), information (News, Sports, Finance) and search, monetised through owned-and-operated inventory and the LumenX exchange. The franchise benefits from durable brand recognition and a logged-in audience that supports first-party, addressable advertising.

Pillar	What it is	Why it matters
AtlasID	Cross-property identity graph and account linkage	First-party, privacy-aware addressability
LumenX Ad Exchange	Programmatic SSP/DSP marketplace	Take-rate on large advertising flows
VistaMail	Consumer email at scale	High-frequency engagement & logged-in signal
Search & Content	Search, News, Sports, Finance	Reach, intent and brand-safe context

3. AtlasID — the identity advantage

AtlasID resolves authenticated users across properties to deliver durable, consented audience signals as third-party identifiers decline. Combined with a telecoms partner's first-party customer base, AtlasID can extend addressable reach and improve match rates across channels — a core element of the value thesis.

4. LumenX — advertising technology

- End-to-end programmatic stack spanning supply, demand and an owned exchange.
- Stable take-rate with scope to expand higher-margin first-party data products.

- Premium brand-safe inventory across owned-and-operated properties.

5. Financial highlights

FY2025 revenue of \$5.15bn (up from \$4.99bn in FY2024) with adjusted EBITDA of \$775m. Revenue is diversified across product lines:

Product	FY2025 revenue	% of total
Search	\$1,480m	28.7%
LumenX programmatic ads	\$1,910m	37.1%
News	\$360m	7.0%
Sports	\$330m	6.4%
Finance	\$300m	5.8%
VistaMail & Communications	\$250m	4.9%
Subscriptions & Other	\$520m	10.1%
Total	\$5,150m	100.0%

Adjusted EBITDA reflects management add-backs for non-recurring items (see DR-025). Cash generation supports continued investment in identity and advertising technology.

6. Growth strategy

- Deepen logged-in engagement and grow first-party addressable audiences.
- Expand LumenX demand and higher-margin data products.
- Modernise the technology estate, including identity and authentication platforms.
- Grow mobile and international monetisation.

7. Combination thesis & synergies

Combining VistaPort's 615m-user franchise and ad-tech with Northstar Mobile Holdings plc's telecoms customer base is expected to unlock approximately \$410m of synergy NPV through enhanced addressability, cross-sell and cost efficiencies (see the integration synergy model, DR-096).

Synergy lever	Description
Addressability uplift	Higher match rates from combined first-party data
Cross-sell	Advertising and subscription cross-sell to telecoms base
Cost efficiencies	Infrastructure, procurement and G&A rationalisation

8. Transaction summary

Management welcomes discussions on a transaction valuing the operating business at approximately \$4.83bn enterprise value, reflecting the scale, mobile reach and ad-tech assets described herein.

This presentation is confidential and provided for discussion only. It does not constitute an offer and is subject to the definitive agreement and the data room.
