## Selected Notes to the Draft Financial Statements

### Note 1 — Basis of preparation

Prepared on a basis consistent with the audited FY2024 statements. Comparatives are derived from the audited FY2024 financial statements. The audit for FY2025 is in progress and these figures remain subject to adjustment.

### Note 2 — Adjusted EBITDA

Management presents adjusted EBITDA of \$775m, reconciled from reported EBITDA of \$612m by add-backs for items management considers non-recurring or non-operational. The detailed bridge is set out in the adjusted EBITDA add-back schedule provided in the data room.

### Note 3 — Commitments and contingencies

The Group is subject to claims and commitments arising in the ordinary course of business. In addition, a **trust-and-safety contingency of \$12m** has been recognised within other liabilities and provisions. Management is monitoring an operational security matter, the outcome of which is not currently estimable. Based on information available at the date of these draft statements, management considers the amount recognised to be a reasonable estimate of the obligation that is both probable and reliably measurable; a wider range of possible outcomes exists but is not, in management's view, currently estimable with sufficient reliability to recognise a further provision.

### Note 4 — Subsequent events

Subsequent to year end, the Group incurred costs in connection with an operational account-integrity programme (referred to internally as the "Trust Reset" programme), comprising staged credential-hygiene activity and associated customer support and third-party professional fees. These costs are reflected, to the extent incurred in the period, within operating expenses and the add-back schedule, and are expected to continue at a reduced level into the early part of FY2026.

*Draft and confidential. Prepared for Project Atlas diligence; subject to completion of the FY2025 audit and to the NDA and clean-team protocol.*
