VistaPort Media Inc. — Monthly Management Accounts

Document ID	DR-022
Prepared by / owner	Victor Osei
Date	9 January 2026
Classification	Strictly Confidential — Project Atlas
Period	December 2025
Status	Unaudited management accounts

Monthly Finance Pack — December 2025. Management accounts and key performance indicators for VistaPort Media Inc.. Prepared by Victor Osei, Group Controller. Figures are management estimates, unaudited.

1. Executive summary

December showed a partial recovery from the November Trust Reset friction. Customer-support contact volumes normalised toward the end of the month and advertising impressions improved. However, email weekly active users and mobile monthly active users both remained modestly below plan at year end: engagement recovery has been slower than modelled.

2. Key performance indicators vs plan

KPI	Plan	Actual	Var.
Email weekly active users (m)	168.4	160.0	-5.0%
Mobile monthly active users (m)	408.6	400.6	-2.0%
Ad impressions (bn, monthly run-rate)	41.2	39.9	-3.1%
Password-reset volume (k/week avg)	904	2040	+125.6%
Login-failure rate (%)	0.80	1.11	+38.3%

At year-end, email weekly active users were ~162m and mobile monthly active users ~403m, both below the plan run-rate.

3. Profit & loss summary (month)

Line item	December
Revenue	\$427m
Cost of revenue	(\$175m)
Customer support & operations	(\$24m)
Trust & safety	(\$12m)
Third-party professional fees	(\$5m)
Other operating expenses	(\$128m)

4. Commentary

- Support: contact volumes normalising; temporary contact-centre capacity wound down.
- Advertising: impressions recovering toward the prior run-rate but not yet fully back.
- Engagement: email WAU and mobile MAU still below plan; recovery slower than modelled.
- Costs: trust-and-safety and professional fees lower than November but above baseline.

5. Outlook

Management expects engagement to continue recovering into FY2026, though the pace remains uncertain. The residual gap to plan in email and mobile engagement is being monitored and factored into the early-FY2026 forecast.
