

Customer Success — Weekly Readout, 14 November 2025

Customer Success — Weekly Readout

Document ID	DR-042
Prepared by / owner	Thomas Vale
Date	14 November 2025
Classification	Strictly Confidential — Project Atlas
Week	Commencing 10 November 2025
Sign-off	Messaging approved by Legal

Weekly Customer Success readout for the week commencing 10 November 2025 (readout dated 14 November 2025). Distribution: SVP Global Advertising, Commercial Operations, Legal (for messaging sign-off). Confidential.

1. Health summary

Accounts in good health (green)	84%
Accounts to watch (amber)	13%
Accounts at risk (red)	3%
Open escalations	9 (7 routine delivery / measurement, 2 messaging)

2. Routine items this week

- Holiday-peak campaign onboarding tracking ahead of plan for retail and travel.
- Two measurement-discrepancy tickets resolved with the verification vendor.
- Viewability optimisation rolled out for three agency accounts.
- Renewal paperwork progressing for four mid-market accounts.

3. Trust Reset — client questions and reassurance scripting

Several agencies and direct clients have asked this week about the **Trust Reset** programme (the staged password-reset and session-refresh communications that some of their end users will have received). The recurring questions are:

- Whether the account resets affected **logged-in targeting pools** or reduced the addressable audiences available to their campaigns;
- Whether specific **audience segments** were impacted or need to be rebuilt;
- Whether anything in our standard data-handling terms has changed.

Customer Success has agreed standard reassurance messaging with Legal sign-off. The approved line is that the Trust Reset is a routine credential-hygiene initiative; that addressable audiences refresh continuously and any short-term variation in pool size is expected to normalise; and that contractual data-handling terms are unchanged. Account teams must use the approved wording and route any question that goes beyond it to Legal (do not improvise on data-handling specifics).

Account	Question raised	Action
Meridian Media Agency	Did resets shrink logged-in targeting pools?	Approved reassurance sent; monitoring incremental bookings
Helios Retail Group	Brand-safety/privacy clarification before Nov flight	Hold logged; clarification call scheduled with Legal on standby

Account	Question raised	Action
Pinnacle Telecom	Were audience segments impacted?	Approved messaging; no segment rebuild required
BlueOrbit Travel	General privacy questions	Standard reassurance; account healthy

4. Actions for next week

- 1 Maintain a single tracked log of Trust Reset client questions (export to DR-043).
- 2 Keep Legal in the loop on any question touching data-handling or exposure.
- 3 Proactively reassure the top-20 agency and regulated accounts.
- 4 Report any account placing spend on hold to Commercial Operations same-day.

Messaging approved by Legal for use this week. Escalate anything outside the approved wording; do not speculate with clients on the cause or scope of the resets.
