

Search Partnership Agreement — Summary

VistaPort Media Inc. — Commercial and Advertising

Document ID	DR-034
Prepared by / owner	Thomas Vale
Date	18 December 2025
Classification	Strictly Confidential — Project Atlas
Subject	Search syndication partnership
Concentration	~22% of search revenue

Summary of the principal third-party search-syndication partnership (the “Partnership”) under which VistaPort syndicates search queries and monetises results through the partner’s advertising marketplace. Prepared for the diligence file. Commercial terms are summarised; the executed agreement is held by Legal.

1. Parties and structure

VistaPort entity	VistaPort Media Inc. (Delaware)
Counterparty	Tier-1 global search-marketplace partner (name redacted in summary)
Structure	Revenue-share on syndicated search advertising
Effective	1 April 2022
Renewal	Initial term to 31 March 2027, auto-renew 2yr

2. Economics and concentration

The Partnership is the single largest contributor to search monetisation. In FY2025 it accounted for approximately **22% of search revenue** (and roughly 6% of total advertising-related revenue). This is a genuine concentration consideration: search revenue of \$1,480m in FY2025 means a material dependency on a single counterparty for syndicated demand.

Metric	FY2023	FY2024	FY2025
Search revenue (\$m)	1,402	1,455	1,480
Partnership share of search	20%	21%	22%
Partnership contribution (\$m)	280	306	326

3. Key terms (summary)

- Revenue-share tiers based on syndicated query volume and realised RPM.
- Service-level commitments on query latency and availability.
- Brand-safety and content-policy alignment obligations on syndicated results.
- Termination for convenience on 180 days’ notice after the initial term.
- No exclusivity preventing VistaPort from operating its owned search experience.

4. Diligence considerations

- Concentration: ~22% of search revenue depends on one partner; renewal falls in 2027.
- Pricing risk: revenue-share tiers reset at renewal; partner has scale leverage.
- Mitigation: owned-and-operated search and LumenX demand reduce single-point dependency.
- No change-of-control consent is required for the proposed transaction under the summary terms.

This is a summary only and does not vary the executed agreement. Figures are unaudited and reconcile to the revenue-by-product schedule (DR-024).
