

# Strategic Partnerships — Summary

VistaPort Media Inc. — Commercial and Advertising

|                     |                                       |
|---------------------|---------------------------------------|
| Document ID         | DR-040                                |
| Prepared by / owner | Thomas Vale                           |
| Date                | 15 December 2025                      |
| Classification      | Strictly Confidential — Project Atlas |
| Subject             | Strategic partnerships overview       |

Overview of VistaPort's strategic distribution, content and identity partnerships, prepared for the diligence file. These relationships extend reach, supply and addressability beyond owned-and-operated properties.

## 1. Distribution and device partnerships

- Device OEM placements: pre-installation and default-experience placements for VistaMail and the VistaPort app across two mid-tier handset OEMs.
- Browser and portal placements: search and content placements with regional portals.
- Connected-TV: content tiles within two CTV platform home experiences.

## 2. Content syndication

| Partner type | What we provide               | What we receive                 |
|--------------|-------------------------------|---------------------------------|
| News wire    | Distribution and monetisation | Licensed news content           |
| Sports data  | Audience and placement        | Live scores and statistics feed |
| Finance data | Distribution                  | Market data and quotes          |

## 3. Identity interoperability pilots

VistaPort runs interoperability pilots connecting AtlasID with two industry identity frameworks to improve cross-publisher match rates as third-party identifiers decline. Pilots are consent-based and privacy-reviewed; early match-rate results are encouraging and inform the 2026 roadmap (DR-047).

## 4. Commercial significance

- Partnerships diversify supply and demand and reduce single-property dependency.
- Identity interoperability is a strategic hedge against signal loss.
- No single partnership in this summary represents a concentration risk on its own.

*Search syndication, the one genuine concentration, is summarised separately at DR-034. Pilots remain subject to privacy review (DR-046, DR-044).*
