

Data Retention & Deletion Policy

VistaPort Media Inc. — Product Data and Technology

Document ID	DR-052
Prepared by / owner	Grace Okafor
Date	1 June 2024
Classification	Strictly Confidential — Project Atlas
Policy ref	DPO-RET-01
Status	Approved

This Data Retention & Deletion Policy (the “Policy”) establishes the maximum retention periods for categories of data held by VistaPort Media Inc. and its subsidiaries, and the controls for secure deletion, tokenisation and anonymisation. It applies to all production systems, analytics stores and backups.

1. Purpose and scope

The Policy implements data-minimisation and storage-limitation principles. It applies to personal data and account-profile data across all properties, including primary stores, the Snowcap analytics warehouse and all backup media.

2. Retention periods

Data category	Maximum retention	Action on expiry
Active account profile data	Life of account + 24 months	Delete or anonymise
Account backups & snapshots	36 months from creation	Delete, or tokenise / anonymise
Authentication & session logs	13 months	Delete
Security-question / recovery data	Life of account	Delete on closure
Marketing & engagement analytics	25 months	Aggregate or delete
Financial & tax records	Per statutory requirement	Retain then delete

Where deletion is not technically feasible within the period, data must be tokenised or irreversibly anonymised, and an exception must be logged and approved by the Data Protection Office.

3. Backups and snapshots

Account backups and snapshots must not be retained for more than 36 months from the date of creation.

On reaching the limit, backups must be securely deleted, or where retention is genuinely required, the personal-data fields must be tokenised or anonymised so that the backup no longer constitutes an identifiable personal-data store. Backup retention beyond the limit requires a documented, time-bound exception approved by the Data Protection Office and Security.

4. Secure deletion standard

- Cryptographic erasure (key destruction) is the preferred method for encrypted media.
- Object-store deletions must remove all versions and disable soft-delete recovery.
- Deletion must be evidenced in a disposal record retained for audit.

5. Exceptions and legal hold

Legal hold overrides scheduled deletion for data within the scope of the hold. All exceptions, including over-retention pending a decommission, must be registered, owned, and given a target disposal date. Exceptions

are reviewed quarterly by the Data Protection Office.

6. Roles and review

Policy owner	Grace Okafor, Chief Privacy Officer
Approver	Priya Raman, General Counsel
Review cycle	Annual, or on material change
Effective date	1 June 2024

Confidential — Data Protection Office. Compliance with this Policy is mandatory.
