

Business Continuity & DR Test Report

Business Continuity & DR — Test Report

Document ID	DR-077
Prepared by / owner	Owen Bell
Date	18 November 2025
Classification	Strictly Confidential — Project Atlas
Test type	Annual BC/DR exercise
Result	Satisfactory

Report on the annual business-continuity and disaster-recovery (BC/DR) test of **VistaPort Media Inc.** conducted in November 2025. The exercise validated recovery procedures for core production services against documented recovery objectives. Results were satisfactory with minor action items.

1. Scope and objectives

- Validate failover of core production services across availability zones.
- Confirm recovery of identity, advertising and communications services within objectives.
- Test backup restoration integrity for in-scope production datasets.
- Exercise the crisis-management and communications runbooks.

2. Test scenarios and results

Scenario	RTO target	RTO actual	RPO target	Result
Primary region failover (compute)	2h	1h 41m	15m	Pass
Identity service (AtlasID) recovery	1h	52m	5m	Pass
Advertising platform (LumenX) recovery	2h	1h 58m	15m	Pass
Email service (VistaMail) recovery	3h	2h 24m	30m	Pass
Warehouse (Snowcap) restore	4h	3h 36m	1h	Pass
Backup integrity restore test	n/a	n/a	n/a	Pass (sampled)

3. Observations

All in-scope services recovered within their recovery-time and recovery-point objectives. Backup restoration tests for in-scope production datasets completed successfully on a sampled basis. The crisis-management bridge was established within the target window and runbooks were followed.

4. Action items

Item	Owner	Priority	Due
Update one stale DNS failover record identified during the test	Infra	Low	15 January 2026
Refresh the contact tree for two on-call rotations	IT Ops	Low	10 January 2026
Automate one manual restore-validation step	Infra	Medium	1 February 2026

5. Conclusion

The Company met its recovery objectives for all tested scenarios. The BC/DR programme is assessed as effective. Action items are minor and tracked to closure.

Prepared by the Office of the CISO. Next scheduled BC/DR test: Q4 2026.
