

Security Steering Committee Minutes — December 2025

Security Steering Committee — Minutes (December 2025)

Document ID	DR-075
Prepared by / owner	Owen Bell
Date	15 December 2025
Classification	Strictly Confidential — Project Atlas
Classification	Confidential — Privileged in part
Chair	Owen Bell, Chief Information Security Officer (resigned Dec 2025)

CONFIDENTIAL — PRIVILEGED IN PART. Minutes of the Security Steering Committee of VistaPort Media Inc. held on 15 December 2025. Certain discussion items relate to a matter under the direction of counsel and are minuted at a summary level only. These minutes are provided for diligence on a restricted basis.

Meeting	Security Steering Committee
Date	15 December 2025
Chair	Owen Bell, Chief Information Security Officer (resigned Dec 2025)
Attendees	Nina Petrov, Head of Security Engineering; Priya Raman, General Counsel; Grace Okafor, Chief Privacy Officer; Thomas Vale, SVP Global Advertising; Daniel Cho, Chief Financial Officer
In attendance	IronLake Forensics (AURORA workstream); Juniper & Rowe LLP (counsel)

1. Standing security operations

The Committee noted routine operational metrics: SOC alert volumes within normal range, patch SLAs on track, and the email-gateway summary unremarkable. The penetration-test and SOC 2 actions are progressing. No further discussion required.

2. AURORA workstream — status

IronLake provided a status update on the AURORA workstream. The Phase 1 technical **draft** findings and the **final** executive summary were both before the Committee. The Committee noted the difference in emphasis between the draft and the final summary and the importance of reading the final summary alongside the underlying privileged work product. Counsel reminded members to preserve privilege and to avoid speculative characterisation in non-privileged channels.

3. Notification and regulator engagement — discussion

A substantive discussion followed on whether, and how quickly, to broaden user notification and to engage regulators. Positions were recorded as follows:

Function	Position recorded
Security Engineering (N. Petrov)	Advocated broader user notification and earlier, proactive regulator engagement. View that the evidence already supports treating affected users as notifiable and that delay increases downstream risk.
CISO (O. Bell)	Supported faster engagement; expressed concern that the matter was being characterised more narrowly than the underlying technical position warranted. Dissent recorded (see item 5).
Legal (P. Raman) / outside counsel	Urged restraint pending resolution of the legal notification threshold; cautioned against over-notification before the threshold is determined, to avoid prejudicing the Company's position.
Commercial (T. Vale)	Flagged advertiser-contract notification sensitivities; preferred coordinated, measured external messaging.

Function	Position recorded
Finance (D. Cho)	Noted reserve and insurance-notice implications; supported a proportionate approach to external steps.

4. Insurance notice

The Committee considered the status of notice under the cyber programme via the broker (Redbridge). It was noted that the position on the notice window required prompt resolution and that the wording of any notice (including how the matter is characterised) was being coordinated with counsel. The Committee asked Finance and Legal to confirm the position.

5. Dissent recorded

The Chair, Owen Bell, asked that his dissent be recorded. He stated that, in his professional view, the technical evidence supported earlier and broader notification than the consensus position, and that he was uncomfortable with the degree of caution being applied to external steps. The Committee acknowledged the dissent.

6. Actions

Action	Owner	Due
Confirm legal notification threshold analysis	Legal / outside counsel	22 December 2025
Confirm insurance-notice position with broker	Finance / Treasury	22 December 2025
Finalise prioritised remediation (key rotation, backup disposition)	Security Engineering	15 January 2026
Prepare coordinated external-messaging holding lines	Legal / Commercial	22 December 2025

Minutes prepared by the Office of the CISO. Items relating to the AURORA workstream are privileged and minuted in summary only. Subject to approval at the next meeting.
