

Key Employee Retention Plan

Project Atlas — Key Employee Retention Plan

Document ID	DR-094
Prepared by / owner	Sandra Lin
Date	20 December 2025
Classification	Strictly Confidential — Project Atlas
Owner	Sandra Lin, Chief Human Resources Officer
Status	Draft for Compensation Committee

Strictly confidential. This Key Employee Retention Plan (the “Plan”) sets out the proposed arrangements to retain critical talent at **VistaPort Media Inc.** (the “Company”) through completion of the proposed transaction (Project Atlas) and a defined post-completion stabilisation period. The Plan is a routine pre-signing retention programme of the kind customary on a transaction of this nature.

1. Objectives

- Retain executives and senior individual contributors whose continuity is important to business performance and a smooth integration.
- Mitigate ordinary deal-related flight risk during the period of uncertainty between announcement and completion.
- Align retained leaders to clearly defined completion and integration milestones.

2. Plan structure

Awards comprise a blend of restricted stock awards (RSAs), cash retention bonuses and milestone-linked top-ups. Awards vest in tranches subject to continued employment and, for the integration tranche, achievement of defined Day-1 and Day-100 readiness milestones (see the Day-1 Readiness Plan, DR-097).

Component	Vehicle	Typical vesting	Trigger
Sign-on / stay award	RSA	50% at signing anniversary, 50% at completion + 12m	Continued service
Cash retention	Cash	1/3 at signing, 1/3 at completion, 1/3 at completion + 12m	Continued service
Integration milestone top-up	Cash	On Day-1 and Day-100 readiness sign-off	Milestone + service
Double-trigger acceleration	RSA	On qualifying termination after change of control	CoC + good-leaver

3. Identified key roles and retention tiers

The following roles are designated key for retention purposes. Tiering reflects criticality to continuity and an assessment of ordinary deal-related flight risk; it is not a performance rating. Individuals are referenced by role to preserve confidentiality.

Role / function	Tier	Flight-risk rating	Retention rationale
Daniel Cho, Chief Financial Officer	1	Medium	Financial continuity, lender and diligence relationships through close.
Priya Raman, General Counsel	1	Medium	Transaction execution, regulatory strategy and disclosure governance.
Maya Hart, VP Product, Identity and Mail	1	Medium-High	Owns identity, mail and the user-metrics roadmap critical to the synergy thesis.
Thomas Vale, SVP Global Advertising	1	Medium	Top-advertiser relationships and revenue continuity.

Role / function	Tier	Flight-risk rating	Retention rationale
Chief Information Security Officer (security leadership)	1	High	Security leadership continuity through integration; elevated flight risk noted following recent senior departures in the security organisation (see DR-095).
Nina Petrov, Head of Security Engineering	2	High	Security engineering continuity and authentication-platform knowledge; flagged as a retention priority given recent attrition.
Raj Malhotra, VP Engineering, Platform	2	Medium	Platform engineering and migration dependencies.
Aaron Klein, VP Corporate Development	2	Low	Corporate development and integration management office.
Senior security engineers (3 named in appendix)	2	High	Specialist authentication / key-management knowledge; targeted retention to stabilise the security organisation.

Security leadership and senior security engineers are flagged as elevated flight risk. This reflects the customary deal-retention assessment together with recent voluntary departures in that function; it is addressed as a routine retention and backfill matter.

4. Indicative pool and governance

Indicative aggregate pool	Approximately 2.1% of equity value, blended RSA + cash
Approval	Compensation Committee; CHRO and CEO recommendation
Clawback	Subject to the Company's standard clawback and forfeiture policy
Confidentiality	Individual awards communicated 1:1; Plan not to be disclosed externally
Owner	Sandra Lin, Chief Human Resources Officer

5. Conditions

- Awards are contingent on signing and, for completion tranches, on completion of the transaction.
- Good-leaver / bad-leaver provisions apply per the Company's standard policy.
- The Plan may be amended by the Compensation Committee prior to signing.

Prepared by the Office of the Chief Human Resources Officer. Figures are indicative and subject to Compensation Committee approval. Confidential — Project Atlas.
